Professional Summary

DevOps Engineer with 4 years of production experience in Kubernetes, CI/CD automation, and infrastructure observability. Worked across retail, banking, and hosting at significant scale.

Work Experience

DevOps Engineer

Magnit Tech — electronic document management system for 30K+ store retail network Aug 2025 – Present

- Designed and automated GitLab CI pipelines for building and deploying a distributed application comprising 15+ Java microservices, reducing deployment lead time by 30%.
- Implemented infrastructure management and deployment automation using Terraform, Ansible, and ArgoCD on Kubernetes clusters hosted in Yandex Cloud.
- Defined pipeline standards, deployment gates, and rollback procedures for a 15+ microservice ecosystem, reducing cross-team release friction.

Tech Stack: Kubernetes, GitLab CI/CD, Terraform, Java, .NET, Docker, Yandex Cloud, ArgoCD, Ansible, PostgreSQL, Windows Server.

DevOps Engineer

Sber Tech — Internal Developer Platform for 2000+ engineers, largest bank of Russia Aug 2024 – Aug 2025

- Developed and maintained observability platform for Kubernetes clusters using VictoriaMetrics, Loki, and Tempo, improving system monitoring and fault detection.
- Enhanced Kubernetes security by enforcing SecurityContext hardening, PodSecurityAdmission controls, NetworkPolicies, and integrated OIDC authentication via Keycloak.
- Implemented Helm-based application lifecycle management with GitOps workflows using ArgoCD, Jenkins, and Nexus artifact repositories.

Tech Stack: Kubernetes, Helm, ArgoCD, VictoriaMetrics, Loki, Tempo, Grafana, Jenkins, Ansible, Nexus, SonarQube, BitBucket, Keycloak.

System Engineer

SpaceWeb — local cloud hosting provider Nov 2023 – Aug 2024

- Managed KVM virtualization: performed diagnostics, migrations, and client/infrastructure VM installation; refactored Ansible playbooks automating service migration from RHEL7 to RHEL9.
- Deployed and maintained local S3-compatible storage using MinIO and developed a Python FastAPI service for bucket/user management.
- Implemented PXE-based OS installation system with Cobbler, authored kickstart scripts, and maintained OS images on bare-metal servers.
- Set up Kubernetes-based DBaaS infrastructure comprising VictoriaMetrics, Alertmanager, Loki, and Grafana, supporting deployment and monitoring.

Operations & Support Engineer

SpaceWeb — local cloud hosting provider Jul 2021 – Nov 2023

- Monitored infrastructure and responded to incidents, managed DNS zones, mitigated DDoS attacks via Bash scripts, and provided LAMP/LEMP support; recognized 7 times as best support engineer.

Skills

Kubernetes · Docker · Helm · ArgoCD · FluxCD · Kustomize · GitLab CI · GitHub Actions · Jenkins · Terraform · Ansible · GitOps · Yandex Cloud · AWS · VictoriaMetrics · Prometheus · Loki · Grafana · Alloy · Tempo · OpenTelemetry · ELK · Bash · Python · Golang · Nginx · Traefik · HAProxy · PostgreSQL · S3 · Keycloak · Vault · Consul · SonarQube

Education

ITMO University

Master of Science in Computer Systems Networking & Telecommunications, 2025

Thesis: Development of the DBaaS platform architecture in a Kubernetes cluster

GPA: 5.0 / 5.0

Saint Petersburg, RU

ITMO University

Bachelor of Science in Computer & Information Systems Security, 2023

Thesis: Development of an automated phishing site search system on virtual hosting servers

GPA: 4.86 / 5.0

Saint Petersburg, RU
